

# OOPsie Meeting

OOPsie

LP1, 2021

Meeting participants: Axel Larsson, Simon Jonsson, Simon Engström, Love  
Lindqvist, Petter Blomkvist  
Facilitator: Love Lindqvist  
Date: 2021-10-01

## §1 Meeting startup

### How is everyone?

All around good. Axel finally has an open day. Love is feeling a lot less stressed.

### Meeting objectives

- Understand the projects MVC structure
- Merge MVCA and database branches to dev

## §2 Reports

1. GUI
  - (a) MVC-architecture is now set up with the static navigation bar. A test-structure is now implemented with "dummy" components.
  - (b) Issues? Some difficulty getting \*.FXML files to auto load when instantiating the controller classes.

## §3 Discussion items

- More user stories so there are things to work on
- Contact and event folders for saving attachments
- MVCA architecture
  - 
  - Will look into if ViewComponent really should call

`fxmlLoader.setRoot(this)`, or if it should wrap the `AnchorPane` object

## §4 Outcomes and assignments

### Outcomes

- MVC-archistructure
  - The type declared in \*.FXML needs to be *type:root*
  - ViewComponent now composes an anchorPane, instead of extending it
- View components should rely on abstractions of model classes

## **Assignments**

- Axel will work on attachments as soon as possible.
- Both Simons' and Love will work on implementing the GUI part of their user stories.
- Petter will finalize save/load functionality and merge into dev this week-end.

## **§5 End of meeting**
