

OOPsie meeting

OOPsie

2021-09-21

Meeting participants: Axel Larsson, Simon Engström, Simon Johnsson, Love Lindqvist, Petter Blomkvist, Supervisor

Facilitator: Axel Larsson

Date: 2021-09-21

§1 Meeting startup

How is everyone?

Everyone is feeling fine.

Meeting objectives

1. Orient ourselves, are we behind or on schedule?
2. Introduce new group member to supervisor.

§2 Reports

Some things have ended up mutable (ex. `contact`), since several objects have references to the same object. `Contact` is a good example since it exists in a list in the `User` class, but a subset of this list also exist in the event-class, since events need to know which contact participated in the event.

We have decided to not have UUID-functionality since we can use the visitor-pattern to build "data-packs" that are easily serialized while keeping references. Much of the model has been implemented.

§3 Discussion items

1. Points to supervisor: How do you think our progress is looking? By next meeting we hope to have MVC structure in program with working model.
2. Next meeting? On campus?

§4 Outcomes and assignments

1. We are on track, right on schedule.
2. We should write more user stories when we have time, also add one more column to separate US backlog and US in-progress.
3. Upcoming meetings will be in person with supervisor.

Assignments

We will sketch on a MVCA pattern and implement until next time. We cannot end the iteration before we have done that.

§5 End of meeting

Thursday 30/9 9:00 EG-3207A.
