

OOPsie Meeting

OOPsie

LP1, 2021

Meeting participants: Love Lindqvist, Simon Engström, Axel Larsson, Petter Blomkvist, Simon Jonsson, Carl Bergman (TA)

Facilitator: Axel Larsson

Date: 2021-09-30

§1 Meeting startup

How is everyone?

Everyone is good.

Meeting objectives

- Discuss where we are right now on the timeline
- Decide when the first iteration should be complete

§2 Reports

1. The group has discussed the MVCA architecture and Simon Engström has designed the implementation and implemented a rough version of the MVC-pattern into the dev branch. The MVC environment is tested and runs, although without design since we havent designed the appropriate components yet.

§3 Discussion items

- Overlapping user stories in GUI
- Implementation of the navigation bar in the GUI
- RAD document and peer review on 7/10
- Time remaining on GUI

§4 Outcomes and assignments

- We need to create a base GUI handler so that components can be developed independently. Simon E and Axel L will test some things.
- RAD, SDD and code due the seventh of September for peer review. Final peer review due the 14th. Final due date is the 21/10.
- Simon J wants to use composition once a class is done and wrap them so that it is reusable. We will have to see when we create design model.
- Statistic-factory in model for generation of data objects to display in front-end would be interesting.

Assignments

We are all getting together this afternoon to work on the project. We will also work on friday. Petter is working on the database saving/loading. The rest will work on user stories and implement their GUI parts. Everyone has to keep writing new user stories!

§5 End of meeting

Next supervisor meeting Thursday 2021-10-07 EG-3207A. Normal meeting sometime tomorrow afternoon (2021-09-30).
