

OOPsie Meeting

OOPsie

LP1, 2021

Meeting participants: Love Lindqvist, Petter Blomkvist, Simon Engström,
Axel Larsson, Simon Johnsson

Facilitator: Simon Johnsson

Date: 2021-10-11

§1 Meeting startup

How is everyone?

Axel's cold is almost over. Petter is almost also having a cold. Love is well. Simon E. still has a cough, but feels noticeably better. Simon J. still has a cold.

Meeting objectives

Discuss peer review hand in due (2021-10-14).

§2 Reports

1. Master merge
 - (a) Finished
2. Attachments
 - (a) Implementation is questionable, refactor?
3. Calendar Page
 - (a) Bugs have been fixed uWu!
4. Dialogue windows
 - (a) Error messages and colour picker have been implemented. NameNotAllowedException has been added.

§3 Discussion items

- ViewComponentFactory
 - Should it still exist since specific class types have to be accessed? All viewcomponents observers? Make return type abstract type and remove everything except root pages needed for RootWindow. Small components shouldn't use the factory.
- Attachment deletion and saving compatibility
 - Refactor to include attachments in the model? Ask supervisor if the domain model has to be exactly like the class diagram instead of just representing it. When should attachments be removed if a contact is removed? Do a check for contact's corresponding folder during shutdown to clean directories.
- Peer review
 - Discuss Peer review tomorrow (11/10)? Reserve time before lunch and afternoon.

§4 Outcomes and assignments

Edit the view component factory to only include root pages. Ask supervisor regarding the domain model and design model similarity. Peer review will be discussed (11/10) before lunch and will be wrapped up afternoon the same day.

Assignments

Make changes to the factory. Simon E. will work on contact tagging while Love will work on VCF integration.

§5 End of meeting
