

Meeting Template

OOPsie

LP1, 2021

Meeting participants: Axel Larsson, Love Lindqvist, Simon Johnsson, TA
(Supervisor)

Facilitator: Axel Larsson

Date: 2021-09-16

§1 Meeting startup

How is everyone?

Axel Larsson, Simon Johnsson and Love Lindqvist are all present and doing good. Unfortunately Simon Engström is at the hospital and needs to stay for at least another 24 hours.

Meeting objectives

- Discuss a few hiccups with the supervisor and get some input.

§2 Reports

We had a meeting yesterday so not much has been done. Everyone has worked a bit on the low fidelity model that we plan to finish this week.

§3 Discussion items

1. Independent user stories with dependent frameworks
2. Saving and loading breaks object references,

§4 Outcomes and assignments

- With some input from our supervisor we came to the conclusion that we cannot waste time on trying to get perfectly independent user stories. We will always strive to achieve it but it is not always possible.
- We could potentially solve this using unique IDS for contacts, we need to do some testing and update the design model if everything works as we think it might.

Assignments

This afternoon the three of us who are present at this meeting will get together and try to figure out the last issues with our design model and hopefully implement it tomorrow.

§5 End of meeting

Next supervisor meeting 15:15 2021-09-21 in M1203C. Still need to have one more unsupervised meeting this week so we will have that sometime tomorrow (2021-09-16).
