

OOPsie Meeting

OOPsie

LP1, 2021

Meeting participants: Axel Larsson, Simon Johnsson, Simon Engström, Peter Blomkvist, Love Lindqvist
Facilitator: Axel Larsson
Date: 2021-09-23

§1 Meeting startup

How is everyone?

Everyone is doing good.

Meeting objectives

Finalize model decisions, plan MVC implementation.

§2 Reports

- Petter has worked hard on the saving and loading. Everything except tags and notes should be working. It shouldn't be hard to implement. The system is using a visitor pattern with a cache addition. Database is singleton.
- Simon J has implemented his own take on the Tag class.

§3 Discussion items

- What tag implementation should we use?
- How do we want to do MVC? MVCA? When should we work on it?

§4 Outcomes and assignments

- We want to use Simon J's implementation with SRP so we avoid inner classes. The classes that have tags will have a list of an interface that has only getters from the tags. To change the tags they will need to be sent to the tag handler.
- Friday would be good but unfortunately Love, Simon J, and Axel have to arrange Gasque and are busy during the day. Monday and Tuesday mornings are empty for those of us at Chalmers.

Assignments

Everyone should read up on MVC/MVCA when they have time. Also try to understand the database system Petter has implemented.

Simon J will merge his tag implementation into the dev branch and add the appropriate interfaces discussed to encapsulate functionality.

§5 End of meeting

Next meeting: Tuesday 28/10 9 AM in EG-3503
