

OOPsie Meeting

OOPsie

LP1, 2021

Meeting participants: Axel Larsson, Simon Engström, Love Lindqvist, Simon Johnsson, Petter Blomkvist

Facilitator: Axel Larsson

Date: 2021-10-45

§1 Meeting startup

How is everyone?

The project due date is approaching and some of us are a little bit stressed.
Overall feeling pretty good.

Meeting objectives

Figure out what needs to be done before due date

§2 Reports

1. Love has added tags to contacts functionality in the UI.
2. Axel has formatted all the code. This transferred some lines of code to him. Will do @author tags later.
3. Simon J has fixed the note interface.
4. Petter has fixed another JSON file that saves the users.
5. Simon E has redesigned some components so they don't look too bad. Also allowed the contactpage to show the events that a contact attends.

§3 Discussion items

1. Should deleted contacts still be viewed in events?
2. Search functionality for events?

§4 Outcomes and assignments

1. We will allow contacts to be left as participant on events even if they are deleted. We have some differing opinions on this topic but this will be fine and easiest to implement.
2. Mostly frontend work and that time would be better spent working on something else.

Assignments

1. Simon J will work on notification user story.
2. Love will work on the VCF-parser.
3. Simon E will work on statistics story but also documentation and RAD/SDD as he already has written the most code.

4. Axel will work on tests and make sure attachments work on linux and then work on tests.
5. Petter will work on functionality for saving/loading and picking user.

§5 End of meeting

Next meeting Tuesday 2021-10-19 in hubben/frum.
