OOPsie Meeting

OOPsie

LP1, 2021

Meeting participants: Supervisor, Simon E, Simon J, Axel L, Love L, Petter B

Facilitator: Simon Engström

Date: 2021-10-21

§1 Meeting startup

How is everyone?

Everyone is feeling fine. Simon J has a bit of a cold.

Meeting objectives

- Make plan for end of project.

- Get more details for oral examination.

- Review trello board.

- Dependency analysis - STAN.

§2 Reports

1. Statistics

   (a) Finished? Yes

   (b) Issues? No.

2. Notifications

   (a) Finished? No

   (b) Issues? No

   (c) Discussion: The functionality is well on its way to be finished,

3. Petter has implemented user-wizard and saving/loading into the main branch.

4. Optimizations

   (a) Simon E has combined two components for better code reuse.

   (b) Improved encapsulation in the list wrappers, now returns shallow copies that are updated through observers.

§3 Discussion items

1. What do we have to do on the oral examination?

2. Implementation of STAN?

3. Trello board up to date?

4. What is left to do?

§4 Outcomes and assignments

1. Information about the oral examination is found on canvas. TL;DR is we need to present the application with all its functionality. Present the contents of the SDD etc.

2. We need to implement STAN some time before sunday, should have been done earlier probably.

3. The trello board seems up to date, and all the core US are implemented. Good job!

4. We need to do some more JavaDoc/UML diagrams for the services/packages, the authors will make sure this is done before sunday. The dependency analysis tool needs to be implemented. The SDD says that every package in the program should have diagrams, if we have subpackages like search in the model, it could be nice to have the subpackages classes in the model-class-diagram to show what design patterns we have used in the implementation, all the instructions are in the SDD. The oral examination needs to be prepared. Some unused functionality like MainPage needs to be removed.

Assignments

§5 End of meeting

This was the last supervised meeting. The group needs one more meeting this week, early sunday morning (2021-10-24), in EG-3508.
