Meeting Template

OOPsie

LP1, 2021

Meeting participants: Love Lindqvist, Axel Larsson, Simon Johnsson, Simon Engström

Facilitator: Love Lindqvist

Date: 2021-09-15

§1 Meeting startup

How is everyone?

- Simon Johnsson: Is feelig good.

- Axel Larsson: Good but has his hands full with OOP and maths.

- Simon Engström: Annoyed we didn't learn all that we needed to do in the course in the begining.

- Love Lindqvist: Good.

Meeting objectives

- Clashing user stories and potential merge conflicts

- Plans going forward

§2 Reports

1. Developed the domain model

2. Made the first iteration of the design model

§3 Discussion items

- How are we supposed to create independent User Stories when functionality is dependent on some sort of "base" to be implemented. (Ex: One user story to be able to add events, one to be able to add contacts to them. On depends on the other)

  - Every slice is dependent on the front end working. Who should create ex. the navigation bar?
  - We could skip the UI for the low fidelity model?

- What should we do next?

  - Begin implementation?
  - Create all tasks from a user story and create sequence?

§4 Outcomes and assignments

- Everyone will start creating sequence diagrams for user stories, and then work on tasks

- We will hold off on creating the UI

Assignments

- Simon Engström: Work on events

- Simon Johnsson: Work on notes

- Axel Larsson: Work on adress, then potentially take another user story

§5 End of meeting

- Reminder for supervisor meeting tomorrow (15/09) at 9:00.
